## PROFILE

I'm a full-stack developer specializing in AI-powered and CMS-driven web applications. I build scalable solutions with React, Laravel, Node.js, and WordPress, and work with tools like Strapi, Contentful, Shopify, and WooCommerce. At Miratech, Program-Ace, and Intellias, I led projects that combined clean architecture with smart automation. I'm passionate about integrating AI into CMS workflows to boost efficiency, improve user experience, and deliver real business value.

## WORK EXPERIENCE

### Intellias

JAN 2021 – MAR 2025

#### Senior Full-Stack Developer

- Led development of scalable finance and e-commerce web apps using React.js, Laravel, and MySQL.
- Integrated headless CMS platforms like Strapi and Contentful for dynamic content delivery.
- Focused on performance, architecture, and cross-team collaboration to deliver high-quality solutions.

### Program-Ace

Mar 2018 – Dec 2020

#### Full-Stack Developer – CMS & E-commerce

- Built CMS and e-commerce platforms with WordPress, React, and Laravel.
- Developed custom plugins, themes, and integrated Shopify/WooCommerce with Stripe and PayPal.
- Ensured responsiveness, SEO, and performance across all projects.

### Miratech

Jan 2016 – Feb 2018

#### Front-End Developer

- Created responsive websites using HTML, CSS, JavaScript, and WordPress.
- Built reusable React components and enhanced UI/UX across client projects.
- Improved SEO and accessibility to support broader reach and usability.

## EDUCATION

### Bachelor's Degree in Software Engineering

2012–2016

Lviv Polytechnic National University

GPA: 3.8 / 4.0
